## Summary

A driven and analytical data professional with 1 year of experience in data analysis and insights generation. Proficient in utilizing data visualization tools, such as Tableau, to generate actionable insights for stakeholders. Successfully managed multiple projects at IFF, utilizing advanced Excel and SQL techniques and statistical analysis to deliver insights and drive data-driven decision-making. Fluent in English and Polish, with an intermediate understanding of German.

## Experience

### Data Analyst

IFF

Feb 2022 - Jan 2023 (1 year)

- Conducted comprehensive analysis of sales data for the entire company, utilizing advanced Excel and SQL techniques to compare actual results against budget targets.
- Generated data-driven insights and recommendations for senior management, which were instrumental in increasing company profits through a price optimization initiative.
- Visualized complex data sets using Tableau, providing clear and concise summaries that facilitated decision-making and helped to drive successful outcomes.
- Analyzed and maintained master data in SAP, SFDC (Salesforce), and other enterprise systems, identifying opportunities for procedure alignment, data harmonization, and process improvements, while also coordinating and supporting the project team with resolving issues related to master data, reporting, and commercial systems integration.
- Assisted in the development, improvement, and documentation of master data governance frameworks to improve data quality for data-driven business analytics.

### Digital Marketing Intern

40Love.ai

Jul 2019 - Dec 2019 (6 months)

- Creating and keeping customers through social media marketing, SEO, content marketing, and paid advertising
- In charge of ad campaigns on Facebook Ads and Google Ads
- Extensively used Google Analytics to find a target audience and analyze insights from website traffic
- Helped with generating sales via direct messaging
